## Product Overview

FAST Comm is a comprehensive data management and system maintenance tool for automation solutions from the innovative leaders of Accu-Sort. FAST Comm is an easy-to-use package that allows operators to configure, monitor, and maintain database, reporting, and other processing activities.

## FAST Comm Capabilities

FAST Comm provides integration between Accu-Sort's FAST Suite and host processes and systems. This integration is performed through processing of shared data between the FAST Comm and host database. Typical data processing includes product table definitions, inventory transactions and production/shipping processing results. Additionally, the configurability of FAST Comm allows scheduling of system events and processes including maintenance tasks such as database table and file cleanups, automatic shift and end of day changes across processes in the FAST Suite and automatic report generation.

## Applications

- > High-speed carton/parcel sortation
- > Order fulfillment
- > Cross docking
- > Small item sortation
- > Returns processing
- > Shipping and manifesting
- > Tote / tray routing

## Industries

- > Parcel shipping/distribution
- > Catalog and mail order
- > Entertainment
- > Pharmacy
- > Eyewear
- > Printing and publishing
- > Manufacturing
- > Consumer goods
