

FAST Label is a complete solution for automated labeling. The FAST Label solution includes the scanners, printer-applicators, controls and software you need to get your labeling process up to speed. FAST Label can be integrated with our other FAST products to create comprehensive solutions for automatic identification and material handling needs.

FAST Label Capabilities

- Up to 90 cartons per minute
- Conveyor speed up to 600 fpm [3 mps]
- Accu-Sort's exclusive tracking software guarantees labeling accuracy and reliability
- Batch mode and key entry of product ID
- Inbound scanning
- Label printing and application
- Outbound verification scanning
- Configurable hardware and software controls
- Manual processing at reconciliation station
- Off-the-shelf architecture provides highly reliable and stable systems

Applications

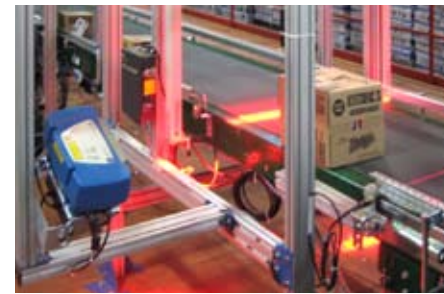

- Inbound receiving
- Carrier labeling, shipping and manifesting
- In-motion weigh and label
- Order fulfillment and price labeling
- Compliance labeling
- Manufacturing product/content labeling and verification

How it works...

1 Bar code scanners at the system induction point identifies inbound packages and initiates the look-up of specific process information.

Point and click WYSIWYG label formatting software allows you to design labels including text and bar codes to meet your requirements and industry standards.

2 FAST Label is configurable to include in-motion weighing; weight is automatically captured and verified against configurable criteria.

3 The system runs on Accu-Sort's industry-proven software with a user-friendly interface for easy setup, operation, and maintenance.

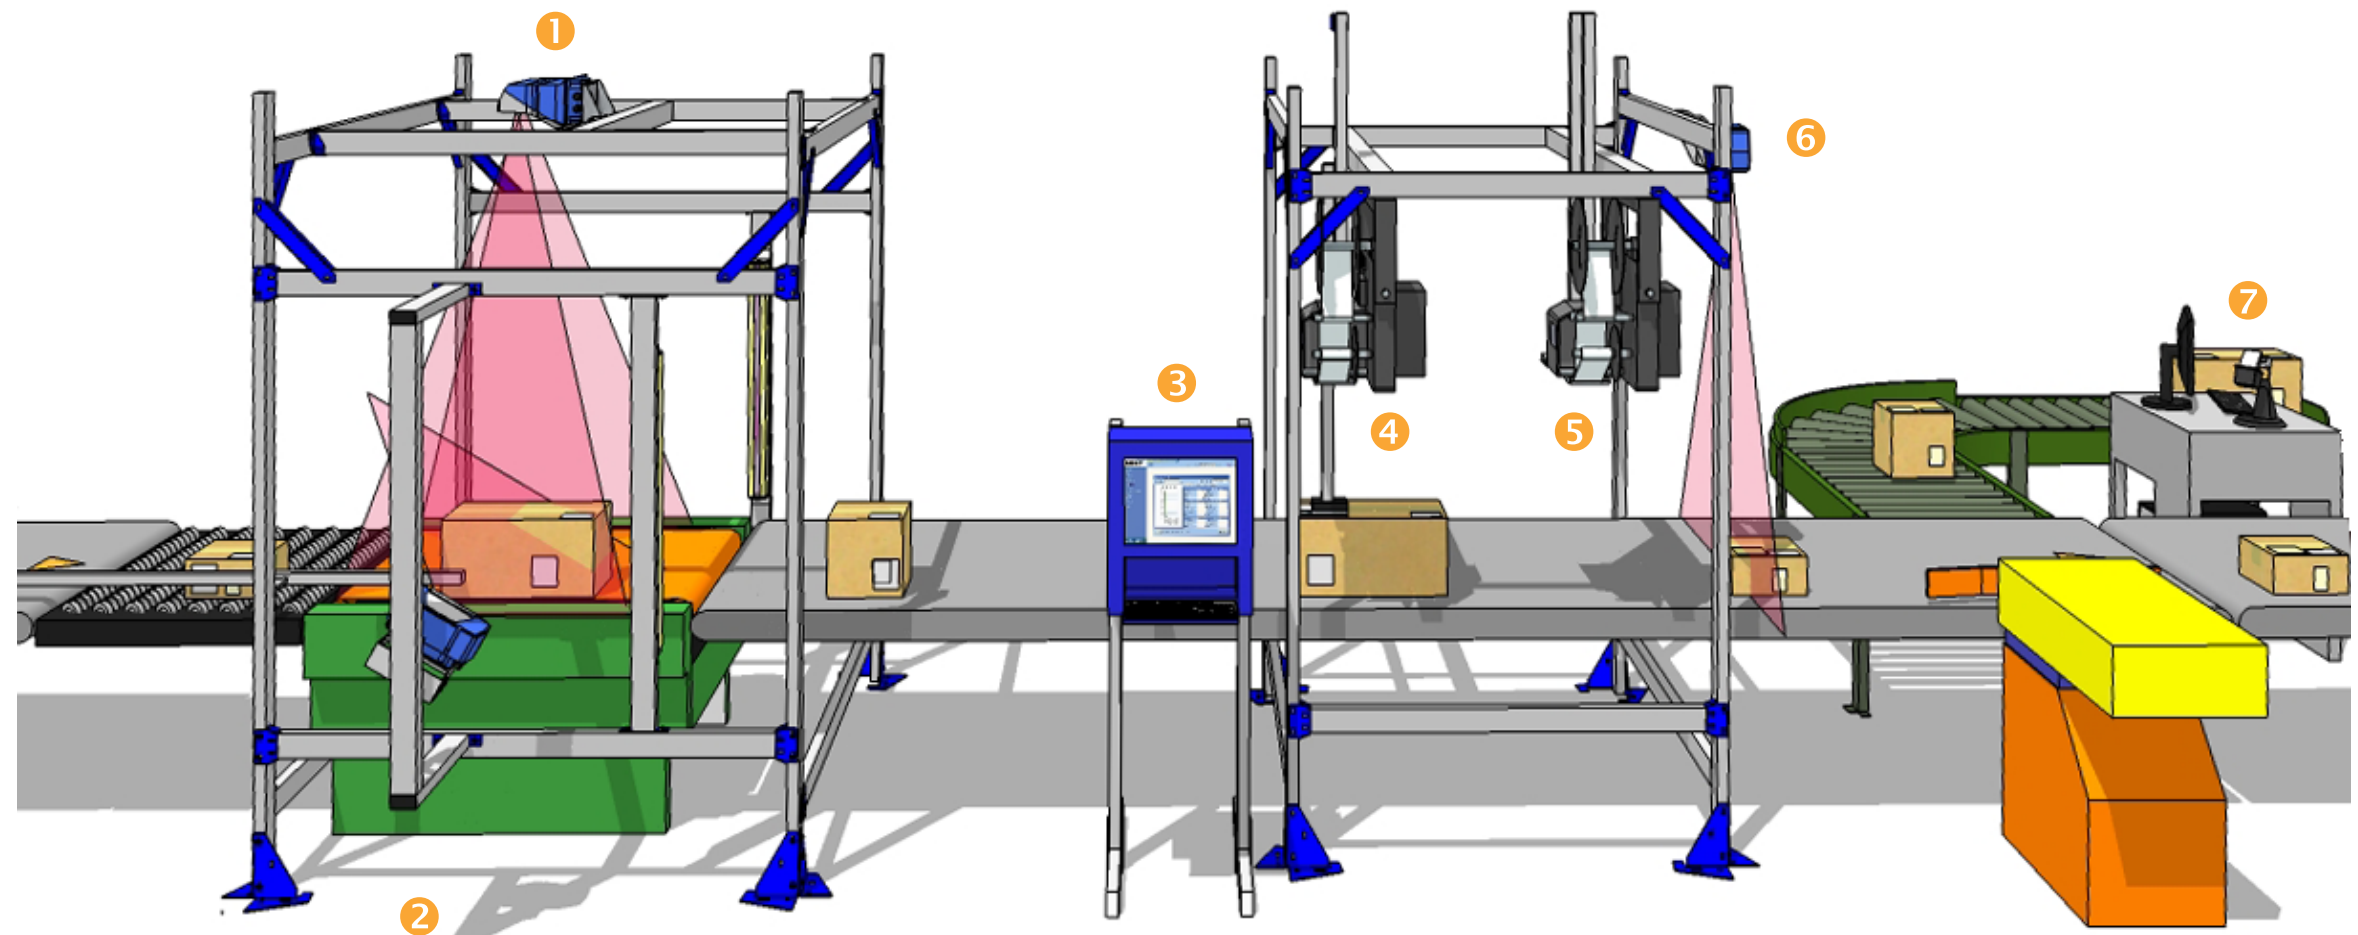

4 Label formatting, printing and application are done on-the-fly by one or more printer-applicators. Item-specific labels are automatically printed and applied to each package.

5 Multiple printer-applicators provide increased throughput, multi-side labeling and use of different label stocks simultaneously.

6 Immediately following label application, a bar code scanner verifies the proper application and label content.

7 Cartons can be manually processed at the reconciliation station, which includes a data entry terminal, hand scanner, bench scale and desktop label printer.

Easy to Configure

- User-friendly setup for all print and apply system parameters
- Drag-and-drop input/output setup and device setup
- Multiple scanners and printer applicators
- Works with Zebra®, Datamax®, Sato® and other print engines
- Flexible off-the-shelf control architecture
- Configurable system controls and shutdown threshold settings

Easy to Use

- Real time statistics allow for improved operation efficiency
- Precise carton tracking ensures error-free labeling
- Standard performance reports

Easy to Expand

- Seamless enterprise integration
- Manifesting and shipping processes
- User design of up to 50 label formats
- In-motion weighing and object measurement

Versatile. Configurable. Complete.

Accu-Sort is a world leader.

Accu-Sort has been providing engineered solutions to automatic identification challenges for over 30 years. Today we are the world leader in fixed-position laser and CCD scanners, providing bar code scanners and a wide range of integrated, real-time data management systems for wholesale, retail, warehousing, distribution and transportation operations.

We offer a broad range of automation solutions.

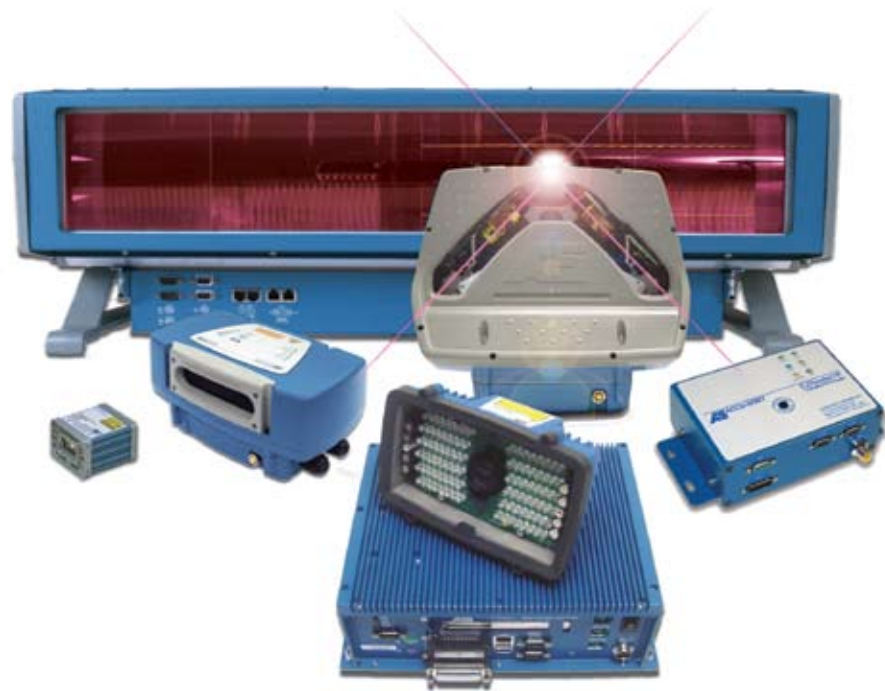

We manufacture the world's most comprehensive family of fixed-mount line and omnidirectional scanners. We also offer the latest in RFID technology, as well as CCD vision technology with the world's largest installed base of CCD systems for bar code reading and dimensioning.

We are your source for turnkey solutions.

Our Integrated Systems Group has developed effective solutions for small-item sortation, labeling, production, shipping, manifesting and inventory systems. Also provided are design, engineering, hardware, software, installation, training and on-site service support.

We stand behind what we deliver.

Accu-Sort has technical support capabilities that are second to none, with a staff that spans the globe and a hotline that is open 24 hours a day, 7 days a week. Also offered are programs for preventive maintenance and training, along with service contracts and warranties that can be customized to meet your specific needs.
